GOOD VIBES ONLY

YOU CAN TRUST EMC TO DELIVER SMOOTH SKIING AND EXCEPTIONAL EDGE GRIP, WHATEVER THE CONDITIONS. WHEN THE SKI BENDS AND VIBRATES, IT TAKES THE KINETIC ENERGY IN THE SKI AND TRANSFERS IT INTO ELECTRICAL ENERGY, WHICH IS THEN USED TO ABSORB NEGATIVE VIBRATIONS FOR A SMOOTHER, MORE STABLE EXPERIENCE.

WHY E-RACE?

Because, if you race, you know there's no such thing as fast enough. These are the tools for those who need speed. A hundredth of a second is small but it's still the difference between winning and losing. That's why you need equipment that delivers critical levels of performance putting you where you belong - out on front. The dedicated racer now has the perfect all-day race ski.

PERFORMS BECAUSE IT'S BUILT TO

Developed with space-age materials, the Graphene WC Sandwich Cap Construction is a superb balance of super-light Graphene and extra titanal layers to give extreme agility and outstanding responsiveness for the ultimate racing performance.

WC SANDWICH CAP CONSTRUCTION

- ① Top Sheet
- ② Glass Fiber fleece
- ③ Titanal Layer
- ④ Glass Fiber
- ⑤ Wood Core
- ⑥ Graphene
- ⑦ Sidewall
- ⑧ Edge
- ⑨ Dampening Layer
- ⑩ Reinforce Glass Fiber
- ⑪ Base

FAST, FASTER, FASTEST.

This year our hero range is race. Every product in this range is designed, constructed and finely tuned to do one thing - put you on the podium. Performance is built into every layer and every part of each ski. They are all tuned to a different style of skiing, but they all have one thing in common - flat out fun.

TRICKLE DOWN TECH

It starts with our top of the range products but it doesn't stop there. Whatever we put into the best we make, ultimately finds its way into everything we make. We don't just want our premium products to perform superbly, we want superb performance to be a part of everything we do, no matter where it is in our product range.
